Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

An examination of this application reveals that applicant is unfamiliar with patent prosecuting procedure. While an inventor may prosecute the application, lack of skill in this filed usually acts as a liability in affording the maximum protection for the invention disclosed. Applicant is advised to secure the services of a registered patent attorney or agent to prosecute the application, since the value of a patent is largely dependent upon skillful preparation and prosecution. The Office cannot aid in selecting an attorney or agent.

Applicant is advised of the availability of the publication "Attorneys and Agents Registered to Practice Before the U.S. Patent and Trademark Office." This publication is for sale by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

Specification

The disclosure is objected to because of the following informalities: On page 5, the brief description of the drawings, the inclusion of the page number, i.e. Page0/9 (BWC2-001) should be deleted for each brief description of the drawings. Further, it is not necessary to also list the individual reference numerals in each Figure. Secondly, the list of reference marks used for the drawings is unnecessary and is not required. As such, the Examiner would like the Applicant to delete these pages. Thirdly, throughout the detailed description of the invention, the Applicant will identify the particular figure code, i.e. BWC2-001. This type of recitation is not required nor is it helpful, as a result, the

Examiner would like to see this type of recitation deleted. Additionally, the Applicant will identify reference numerals such as 11.1, 11.2, 11.3, etc. In reading the specification, this type of recitation makes it very difficult to discern all of the .1, .2 and .3. As a result, the Examiner would prefer to see 11a, 11b, 11c, etc... Lastly, it is not necessary for the Applicant to give all of the dimensions of the various elements, as such, the Applicant can delete this type of recitation.

Appropriate correction is required.

Drawings

The drawings are objected to because of formal errors. First, the Applicant needs to delete lines drawn in to denote the margins, the recitation of the Applicant's name and title of invention, the labels on the bottom of each page of drawings, the recitation stating the view of the figure, any dimensions and angles associated with the individual parts, any recitations directing the viewer to the specification, and unmarked multiple figures on a single page. Further, figures should be labeled from 1-9 for example, as opposed to 0-9. Each drawing page can merely have the serial number of the application. The Applicant's serial number associated with this application is 10/627,907. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are narrative in form and replete with indefinite and functional or operational language. The structure which goes to make up the device must be clearly and positively specified. The structure must be organized and correlated in such a manner as to present a complete operative device. The claim(s) must be in one sentence form only. Note the format of the claims in the patents cited in this office action. For example, in claim 1, the applicant merely claims a mechanical apparatus, the remaining claim language "for allowing cleaning of fish.....when not in use," is functional language directed towards the intended use of the mechanical apparatus, however, there are no positively claimed elements which further modifying the mechanical apparatus. Claims 3, 4 and 6 have multiple sentences. Each claims can only be one sentence in length.

Conclusion

Summary: Claims 1-9 are rejected.
